

HIGH WATER LEVELS AND FLOWS

Good afternoon Wolfe Lake,

Please be advised that we are experiencing high water levels and flows further up the system from Wolfe Lake. We are working diligently to rectify this situation. Once we have the sector above you under control, we will then move onto running water to return Wolfe Lake water levels to within seasonal range.

We wanted to reach out to let you know we are monitoring the situation and are aware of the fact that lake levels are fluctuating presently. Our water management team will be continuing to manage flows throughout this challenge.

Please let me know if you have any questions.

Sincerely,

General Inquiries Administrator
